Summary

Final-year CSE (Data Science) student with 1+ year of hands-on experience in business analytics, stakeholder reporting, and data-driven decision support through a B2B SaaS startup and a government-backed national initiative.

Education

Manipal University Jaipur, B.Tech CSE – Data Science	2023 – Present
Taxila Public School	2021 – 2023
Sophia Girls' School	2009 – 2021

Experience

Business Development Executive | Unison Flow Pvt. Ltd. July 2025 – Present

- Represent the company in client-facing meetings across 3+ ongoing institutional pilots, managing stakeholder communication and requirement gathering end-to-end
- Track delivery timelines and coordinate across product and engineering teams to maintain SLA adherence through weekly status reporting and dependency tracking

Product Intern | Indian Army June 2025 – July 2025

- Contributed to the redesign of a vehicle tracking system across 5+ distributed checkpoints, improving operational visibility and reducing manual reporting overhead.
- Coordinated with stakeholders to define requirements, validate tracking accuracy, and document operational continuity workflows for low-connectivity environments.

Projects

VenturePulse | Python, pandas, SQL, SQLite, Streamlit, ETL

- Built an end-to-end ETL pipeline ingesting 5,956 Y Combinator startups, automating data cleaning into a SQLite warehouse and authoring 7 analytical SQL queries with window functions (LAG, ROW_NUMBER) for year-over-year industry growth and team-size analysis.
- Delivered an interactive Streamlit dashboard with KPI cards and filterable trend charts, translating raw startup data into momentum signals for non-technical stakeholders.

MLFoundry | Python, FastAPI, React, XGBoost [GitHub]

- Managed end-to-end delivery of a full-stack ML platform - scoped requirements, coordinated development phases, and shipped a production-ready system with CI/CD pipeline.
- Engineered an end-to-end AutoML platform - 4 ML models, Bayesian HPO (50 Optuna trials vs 1,000+ for grid search), and SHAP explainability, ranked by 5-fold cross-validated score from a single CSV upload.

CodeLens | Python, AWS, Distributed Systems [GitHub] [Live Demo]

- Built a repository analysis platform using AWS Lambda, S3, and Bedrock to generate architecture summaries and documentation for unfamiliar codebases.
- Ranked Top 100 nationwide (10,000+ teams) in the AWS AI for Bharat Hackathon with a fully cloud-native architecture.

Technical Skills

Programming & Data Analysis: Python, SQL, Pandas, NumPy

Data & Analytics: Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization

AI Tools: ChatGPT, Claude, Gemini, AI-assisted Data Analysis, Workflow Automation

Tools & Platforms: AWS (Basics), Power BI, Streamlit, Git, GitHub, Excel, Notion

Business & Operations: Stakeholder Coordination, Requirement Gathering, Process Documentation, KPI Tracking

Achievements & Certifications

- **Top 100** – AWS AI for Bharat Hackathon (CodeLens) | 10,000+ competing teams
- **Global Rank 330** – Amazon ML Challenge
- **1st Runner Up** – Inter-College Kagglethon
- **Rank 250** – National AI Olympiad (Accenture)
- **Selected** – Google Build with AI Bootcamp
- **Open Source Contributor** – RapidFuzz (merged PR, Python ecosystem)

Positions of Responsibility

National Executive Head & State Convener | INDGenius India July 2025 – Present

- Led state-level operations for 5+ events including scheduling, resource allocation, stakeholder engagement, and post-event reporting
- Led and Managed program operations for a Government of India initiative across multiple state-level events, overseeing scheduling, resource allocation, and cross-chapter coordination for 5000+ student community
